To whom it may concern,

Steven and Kalina Shepard volunteered teaching Devotional Biology coupled with Critical Thinking tools at our school in Mount Vernon, Washington from September 2021 to May 2022. In their position, they reported to me, managed a weekly 2-hour class and associated tasks for our students in the 9th grade. They both were very passionate about investing in the needs of our students and wanted to make a difference in their lives, thus were willing to travel the long distance necessary from their own home to our school weekly.

Steven and Kalina fulfilled a much-needed position at our school. By going beyond the basics, they encouraged our students to think critically by weighing and testing the student's skills to better understanding themselves and the world they live in. When I asked one of the students how the class was going for her, she said that she looked forward to it because it was her favorite class of the week.

The year was a success, and we were very happy to have worked with Steven and Kalina. If you need motivated and creative people to help in a homeschool/educational environment and want to push your students or individuals you are working with to grow, I highly recommend both Steven and Kalina.

If you would like additional information regarding Steven and Kalina regarding their teaching, please feel free to call or text me at (406) 570-4523.

Sincerely,
Bobi Courtney
